

Feel *You'll* *the* *Difference*

Many water supplies contain hardness minerals (calcium and magnesium), iron, rust, and sediment. These minerals form a scale and create problems in water heaters, washing machines, dishwashers, coffee makers, humidifiers and plumbing systems. Nelsen water conditioners and drinking water systems are designed to reduce these unwanted contaminants providing your family with a refreshing difference, saving you money now and in the years ahead.

NelsenWater
Treatment Solutions

9000/9100 Series Softeners and Filters

Benefits of a Nelsen Water Treatment System

In the Bathroom: Your soap and shampoo will lather better. Your hair and skin will feel noticeably cleaner, softer and not as dry. Additionally, there will be no soap scum or mineral deposits to clean off sinks, showers, tub and toilets.

In the Kitchen: Dishes will clean up more easily, and be spot-free, without the gray film glass gets when etched by mineral laden wear. Plus hands will feel softer and look better.

In the Laundry: Clothes will be softer, cleaner, whiter, and brighter. Plus they will last longer. Using soft water and pure soap products increases the life of clothing, towels and linens up to 33%. Without hard water service issues, washing machines will last longer, too.

Plumbing and Appliances: Appliances that use water will last longer and run better. Why?

Because hot water heaters, washing machines and dishwashers using hard water can wear out 30% faster.

Over time, soft water savings can really add up. For instance, conditioned water not only delivers greater washing power, it reduces the amount of soap you need to use by up to 70%. In fact, the Bureau of Statistics found that between 17 and 20.8 cents of every dollar are spent on cleaning products. Soft water can reduce that bill by up to 65%. It can also eliminate extra rinse cycles and hot water. Plus using less detergent, household cleaners and chemicals is better for the environment.

9000/9100 Series Softeners

Nelsen brand water conditioners and filtration products have been providing homeowners with the best water treatment solutions for more than 50 years. Working with the professional water treatment dealer, your new Nelsen water treatment system will fit your exact needs and provide you with years of quality, conditioned water.

Fleck Brand Twin-Tank Control Valves

Twin-tank systems provide your family with soft water 24 hours a day, seven days a week. That's because the second tank of soft water acts as a backup, ready to immediately provide soft water once 100% of the first tank is used. While

the second tank is in service, the first tank regenerates, giving you all the advantages of continuous soft water.

Fleck 9000 Mechanical Control Valve

Noryl or Lead-Free Brass Construction

Manufactured from high-tech Noryl(R)* material, the 9100 valve has been engineered and tested to withstand the equivalent of 27 years of uninterrupted daily use. The time-tested 9000 control features Lead-Free Brass construction.

15% savings in both water and salt

Unlike preset systems, the twin-tank system regenerates with soft water only when necessary. Plus it uses 100% of the tank in service. The end result? Fifteen percent savings in both water and salt**

Fleck 9000 SE Electronic Control Valve Shown on Softener

Electronic or mechanical.

Your choice of the highly reliable 3200 mechanical timer or advanced SE electronic timer with easy programming and minimal parts.

Large homes and families.

Large families will appreciate the Fleck high flow capacity 1 inch control valve. Large homes with 1" plumbing will benefit from the Fleck 9000 1" control valves high flow rates. This means you will have plenty of soft water to do laundry, take showers and run the dishwasher all at the same time.

Fleck 9000 1 Inch High Flow Capacity Control Valve

9000/9100 Series Softeners

Fleck 9100 SE Electronic Control Valve

Only pennies per day to operate.

Choose the SE electronic timer, and you'll pay only \$4.87 in electricity for the entire year. Choose the mechanical timer, and that cost is less than 25 cents per year!***

Additional Features Of the Nelsen Brand Water Conditioning Systems

High quality, cation water softener exchange resin.

Tough, high density, polyethylene salt storage tank. Additional features available to match any decor. Full five year control valve warranty, ten year tank warranty.

Nelsen Corporation also offers a complete line of drinking water equipment. Combining these systems with Nelsen brand water filters and softeners provides your family with pure, fresh water right at your kitchen tap. Ask your professional water treatment dealer for a recommendation.

* Noryl (R) is a registered trademark of the General Electric Co.

** Compared to a system with meter delayed regeneration and the reserve set at 30% of the system capacity, provided that half of the reserve capacity is unused.

*** Based on one regeneration per day at \$0.0745/kw.
